

HORSERACING INTEGRITY AND SAFETY AUTHORITY

WHAT'S NEW UNDER HISA

ANYONE WITH A LICENSE AND ACCESS TO THE BARN AREA MUST BE REGISTERED WITH HISA BY JULY 1

The process is not perfect, and HISA is still working to correct issues. Go to hisaus.org to register. If you have any problems, call your local horsemen's office.

EVERY HORSE MUST BE REGISTERED WITH HISA BEFORE IT WILL BE ALLOWED TO RACE

There will be a grace period where horses will be allowed to enter. If the horse is not yet registered at entry time, the trainer will be notified and will have until scratch time to get the horse registered. If the horse is not registered by scratch time, it will be scratched. When the grace period ends, Racing Offices will not be allowed to take entries for unregistered horses.

ALL HORSES MUST BE REGISTERED BEFORE THEY HAVE AN OFFICIAL TIMED WORKOUT

The best practice is to register the horse as soon as it comes into your barn. There have been issues with registering unnamed horses.

TRAINERS MUST KEEP DETAILED TREATMENT RECORDS

Trainers do not have to submit treatment records, but they must be available for inspection, and they must be available for transfer to the new trainer if you have a horse claimed from you. We have attached a template for record-keeping that you can use if you like.

TRANSFER OF CLAIMED HORSE TREATMENT RECORDS

If you have a horse claimed from you, you must transfer the treatment records to the new trainer within 3 days of the claim.

TRAINERS MUST GET TREATMENT RECORDS FOR HORSES SHIPPING INTO THEIR STABLES

If you get a new horse into your stable from the farm, you must get the last 30 days of treatment records for that horse and keep them with your treatment records. If the horse has been off the track for 60 days or more, you must also get the last 30 days of exercise records.

PROHIBITED PRACTICES

You can no longer pinfire, freeze fire or blister a horse.

THERAPEUTIC TREATMENTS

Horses cannot receive therapies such as magnetic wave or laser within 48 hours of a race or an official timed workout.

SHOCK WAVE THERAPY

Horses will be placed on the Vet's List for 30 days (no racing or breezing).

HORSE SHOES (Goes into effect August 1, 2022)

No traction devices are allowed in training or racing from front and hind limb shoes with one exception: A full (outer) rim that is 2mm or less in height from ground surface of shoe is permitted as long as a toe grab is not present on the shoe. Rim must extend the entire circumference of the shoe so its ground surface is parallel to solar surface of hoof.

No traction devices are allowed on front and hind limb shoes on turf.

RIDING CROP VIOLATIONS – DQ OF THE HORSE

A jockey is limited to six strikes with the crop per race. If the jockey goes over the limit by 4 or more strikes, the horse will be disqualified from the purse.
